## **6.0 The Roles of Teachers, Students and Parents in Teaching and Learning**

Good relationships between a teacher, student and parent, or guardian is fundamental to ensuring successful learning. This section outlines the roles of each participant in facilitating effective teaching and learning of Life Skills.

### **6.1 Roles of a Vocational Teacher**

The teacher is expected to:

- (a) Help the student to learn and develop the intended competences in Life Skills
- (b) Use teaching and learning approaches that will allow students with different needs and abilities to:
  - i. Develops the competences needed in the 21<sup>st</sup> Century; and
  - ii. Actively participate in the teaching and learning process.
- (c) Use student-centered instructional strategies that make the student a center of learning which allow them to think, reflect and search for information from various sources;
- (d) Create a friendly teaching and learning environment;
- (e) Prepare and improvise teaching and learning resources;
- (f) Conduct formative assessment regularly by using tools and methods which assess theory and practice;
- (g) Treat all the students according to their learning needs and abilities;

- (h) Protect the student from the risky environment while he or she is at school;
- (i) Keep track of the student's daily progress;
- (j) Identify individual student's needs and provide the proper intervention;
- (k) Involve parents/guardians and the society at large in the student's learning process;  
and
- (l) Integrate cross-cutting issues and ICT in the teaching and learning process.

## **6.2 The student**

The student is expected to:

- (a) Develop the intended competences by participating actively in various learning activities inside and outside the classroom and;
- (b) Participate in the search for knowledge from various sources, including textbooks, reference books and other publications in online libraries.

## **6.3 The parent/ guardian**

The parent/guardian is expected to:

- (a) Monitor the child's academic progress in school;
- (b) Where possible, provide a child with the needed academic support;
- (c) Provide the child with safe and friendly home environment which is conducive for learning;
- (d) Keep track of the child's progress in behaviour;
- (e) Provide the child with any materials required in the learning process; and
- (f) Instill in the child a sense of commitment and positive value towards education and work.

## **7.0 Teaching and Learning Methods**

The teaching and learning methods are instrumental in developing student's competences. This syllabus suggests teaching and learning methods for each activity which includes but not limited to brainstorming, demonstration, case study, role play, guest speaker, discussions, presentations, hands-on activities, and think-ink-pair-share. However, a teacher is advised to plan and use other appropriate methods based on the environment or context. All the teaching and learning methods should be integrated with the everyday lives of students.

## **8.0 Teaching and Learning Resources**

The process of teaching and learning requires different resources. In that regard, both a teacher and students should work together to collect or improvise alternative resources available in the school and home environment when needed. Teachers and students are expected to constantly seek information from various sources to effectively facilitate the teaching and learning process. The list of approved textbooks and reference books shall be provided by the TIE.

## **9.0 Assessment**

Assessment is important in teaching and learning Life Skills subject. It is divided into formative and summative assessments. Formative assessment informs the teacher and students on the progress of teaching and learning, and in making decisions on improving the teaching and learning process. Teachers are therefore, expected to apply a wide range of formative assessment methods which include but are not limited to demonstrations, discussions, presentations, oral questions, experiments, observations, practical assignments and projects.

Summative assessment, on the other hand, will focus on determining student's achievement of learning. Teachers are expected to use a variety of summative assessments including mid-term tests, terminal, mock examinations and projects. The scores obtained from these assessments will be used as Continuous Assessment (CA). Therefore, the continuous assessments shall contribute 30% and the National Form IV Examination shall be 70% as indicated in Table 2.

### **9.1 Project Work**

Project work is a carefully planned and clearly defined task or problem that a student undertakes, either alone or in a group, to enhance and apply the skills and knowledge gained in the classroom, workshop, kitchen, or laboratory. It is based on the principles of "Learning by Doing" and "Learning by Living." In this context, the implementation of Project Work in secondary schools' vocational streams is essential. Projects in the vocational stream should be conducted in the core subject (occupation). To ensure its success, the supervision and assessment of student project work must be consistent with the established guidelines provided by National Examinations Council of Tanzania (NECTA).

**Table 2:** *Contribution of Continuous Assessment and National Examination in the Final Score*

S/No	Assessment category	Percentage (%)

4.	Project	7.0
5.	Form IV Mock Examination	7.0
6.	Form IV National Examination	7.0
<b>Total</b>		<b>100</b>

### **10.0 Number of Periods**

The Life Skills Syllabus for Ordinary Secondary Education Vocational Stream Form I-IV provides time estimates for teaching and learning each specific competence. The estimates consider the complexity of the specific competences and the learning activities. For Form I and Form II, two (2) periods of 40 minutes each are allocated per week. For Form III and Form IV, four (4) periods of 40 minutes each are allocated per week. This allocation ensures adequate time for students to engage with and master the syllabus content as they progress

### **11.0 Teaching and Learning Contents**

The contents of this curriculum are presented in matrix form with eight columns which include main competences, specific competences, learning activities, suggested teaching and learning methods, assessment criteria, suggested teaching and learning resources, and number of periods as presented in Table 3-6.
